2017 minimus CALERA CLONE CHARDONNAY chehalem mountains

Calera clone chardonnay was imported from Burgundy by an unknown source and was eventually named after the Calera winery in Hollister, CA. 2017 was the first year that we worked with this fruit from Dick Erath's original planting at Chehalem Mountain, and we love it's structure and character too much to blend it into a larger lot. Aged for 16 months in a combination of neutral and new oak, and bottled unfined and unfiltered.

ALC.	13.6%
pH.	3.38
SOILS.	sedimentary
AGING.	combination neutral & new French oak
CASES PRODUCED.	30
