# 2017 minimus MENDOZA CHARDONNAY eola-amity hills

Mendoza chardonnay results from the failed experiment to eradicate millandrage from the Wente clone, that made its way from UC Davis to Argentina to Australia and is now widely planted in several countries.

While millandrage, also known as “hens and chicks,” is generally considered a flaw, it is also known for grapes of varying ripeness which helps acidity levels in the finished wine.

ALC.	14.1%
pH.	3.31
SOILS.	basalt
AGING.	neutral French oak
CASES PRODUCED.	80
