2016 Origin GOUGES ZIVO VINEYARD eola-amity hills

Pinot “Gouges” is a white-skinned mutation of Pinot Noir, discovered by Henri Gouges in Burgundy in the 1930s. Lucky for us, he isolated this anomaly, rather than blending it away into his Pinot Noir. In another stroke of luck, some bud wood was smuggled into the United States! We direct-pressed 60% of the fruit, and destemmed the other 40% to ferment and age on its skins for 6 months.

The finished wine saw an addition of 40 ppm SO₂ and was bottled un-fined and unfiltered.

ALC.	13.69%
PH.	3.69
TA.	4.6 g/L
SOILS.	Sedimentary
SKIN CONTACT.	40%
AGING.	neutral French oak
CASES PRODUCED.	45
